Applications

iPECS One

iPECS One is the next generation of Mobile and PC-based voice and video communications from Ericsson-LG Enterprise. iPECS One is built on WebRTC that allows PC-based users to setup voice, video and chat sessions quickly and easily from their web browser. Accessing iPECS One on a mobile device is available via the Android or iOS applications (mobile phones only).

Key features include:

- Voice calls: Make, receive, and manage calls from your PC or mobile
- Chat: Use instant chat to communicate and share media with colleagues on a one-to-one basis or via a group
- Video: High quality 1:1 video sessions with colleagues
- Contacts: Quickly access and manage company and personal contacts from PC or mobile devices
- Call Log: Instant access to call history from a mobile or PC. Ensuring no calls are left unreturned

iCall Suite call analytics and reporting;

iCS Insight: Full visibility of call traffic via an online dashboard and real-time wallboard.

iCS Report: Monitor inbound and outbound calls on any device. Access configurable dashboards and detailed reporting. View wallboards, run and schedule reports.

iPECS2TEAMS

iPECS
Your Communications Solution

Deliver voice functionality directly to the Microsoft Teams client from iPECS Cloud with iPECS2Teams. Integration is quick and simple thanks to the template-based provision process we have developed.

iPECS Cloud Mobile

iCM is a mobile service that delivers telephony functionality to the user through iPECS Cloud. Removing the need for a mobile app, iCM delivers key deskphone functionality to the user and business directly through the SIM.

Cloud Portal

A simple yet intuitive interface makes it easy to manage the day to day running of your

communications. Fully configurable admin and user access enables you to tailor the interface to meet your business needs.
